Frontend

INTERESTS

Problem Solving
Analytics
Logic Building

OBJECTIVE

An organized and motivated student ready to face the challenges and capable of working under pressure in all environments, passionately striving for excellence in the field of Computer Science. My goal is to pursue a dynamic and challenging career, integrating my own interests with that of the organisation, thereby acting as a catalyst in each other's growth.

EDUCATION

2024	Btech United College of Engineering and Research 7.55

PROJECTS

SentimentZen

SentimentZen is an innovative project that leverages natural language processing (NLP) and sentiment analysis techniques to develop a personalized mood enhancement system. The system aims to uplift users' moods by providing tailored recommendations, such as songs, books, podcasts, meditational advice etc. By analyzing user input, which can be in the form of text or audio, and employing advanced NLP algorithms, SentimentZen offers an intelligent and empathetic approach to mood enhancement.

Sudoku Using C plus plus

A simple mini project used to solve sudoku

Bus reservation System

A java based project to book and cancel tickets of bus.

ACHIEVEMENTS & AWARDS

2 ⭐ at codechef using C++

4 ⭐ at HackerRank in C++ and certified for problem solving .

Top 3000 contest rank 5 times and 706 AIR in Starter 87 at codechef.

Participated and shared my idea on Accenture innovation challenge.

400+ question solved on online platforms like codechef, leetcode, geekforgeeks
